INTRODUCTION

The Department of Health is committed to making information about COVID-19 vaccines available to everyone in Australia, including culturally and linguistically diverse communities. This stakeholder pack includes translated communication resources on the latest COVID-19 vaccine information.

You are receiving this pack because you are a key stakeholder with important connections in your community. We encourage you to share the resources in this pack across your networks. Through your help and support, we can ensure the community stays informed about COVID-19 vaccines through official sources.

LATEST UPDATES

COVID-19 vaccine rollout

COVID-19 vaccine booster doses are available for everyone aged 16 and over who completed their primary course of COVID-19 vaccination at least three months ago.

On December 24, 2021, the Australian Technical Advisory Group on Immunisation (ATAGI) recommended that the booster dose interval be shortened from four months to 3 months on 31 January, 2022. This was in response to the increased likelihood of transmission due to the Omicron variant. ATAGI's full statement is available on the Department of Health's [website](#).

On 3 February, 2022, ATAGI recommended that young people aged 16 – 17 years receive a booster dose of COVID-19 vaccine at least three months after their primary course vaccination.

People aged 16 and over who are severely immunocompromised and have received a third dose of COVID-19 vaccine should receive an additional booster dose in line with the general population.

LATEST UPDATES

COVID-19 vaccine rollout

On 24 January, 2022, ATAGI recommended the use of Novavax as a primary course of COVID-19 vaccination in people aged 18 years and over. ATAGI's full statement is available on the Department of Health's [website](#).

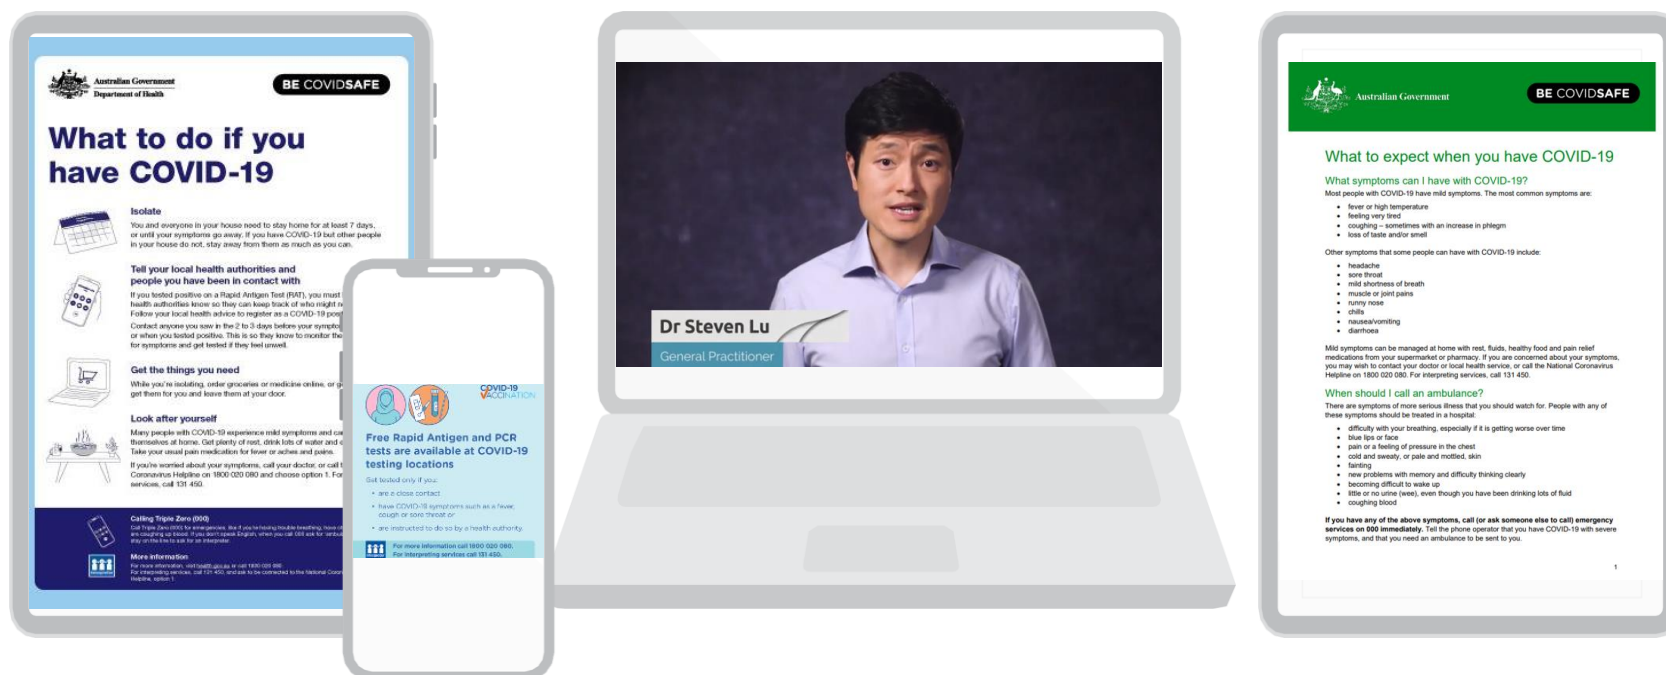

People aged five and over who are severely immunocompromised should get a third dose of their COVID-19 vaccine as part of their primary course of vaccination.

On 11 February 2022, ATAGI recommended a change to the definition of COVID-19 vaccine status from 'fully vaccinated' to 'up to date'. To be considered up to date with COVID-19 vaccination, you must have had all the doses recommended for your age and health needs. Read [ATAGI's statement](#) on defining 'up-to-date' status for COVID-19 vaccination.

Please continue to check the Department of Health's [translated web pages](#) on COVID-19 vaccines for new in-language information and resources, including updates to the COVID-19 vaccine rollout.

IN THIS PACK

This pack contains translated resources with information about COVID-19 booster doses and third doses, information for parents and guardians about vaccination of children aged 5 to 11, information about living with COVID-19, and other videos, audio, posters, social media assets and fact sheets on COVID-19 vaccines.

WHAT YOU CAN DO TO HELP

Share the email with the link to download this stakeholder pack with your network.

Share the resources in this stakeholder pack with your community by posting on social media platforms or messaging apps such as WhatsApp, Viber, WeChat, KakaoTalk or Facebook Messenger.

Print fact sheets and posters and display in your place of work, or community and migrant centres.

Encourage your community to get vaccinated to protect themselves, their families and communities.

KEY MESSAGES

COVID-19 vaccines

- The Australian Government has started rolling out COVID-19 vaccine booster doses to young people aged 16 and 17 who have completed their primary course vaccination at least 3 months ago.
- A booster dose ensures your protection against COVID-19 is stronger and longer lasting.
- All individuals aged 16 years and over are recommended to receive a COVID-19 vaccine booster dose to maintain an “up-to-date” vaccination status.
- This booster dose is now recommended from three months after the last primary dose. This is called the ‘due date’.
- Children aged 5 – 11 years can get their COVID-19 vaccine now.
- There is no evidence that COVID-19 vaccines lead to future infertility in children.

KEY MESSAGES

Living with COVID-19 and testing

- If you have COVID-19 symptoms, you should get tested even if they are mild.
- Rapid antigen tests (RATs) and polymerase chain reaction (PCR) tests are available at testing locations.
- If you are a concession card holder, you are entitled to 10 free rapid antigen tests over a three month period.
- If you test positive for COVID-19, you should isolate immediately.
- Mild symptoms can be managed at home with rest, plenty of fluids, healthy food and pain relief medications.
- If you have serious symptoms such as difficulty breathing, call an ambulance by dialing 000.

KEY MESSAGES

Learn More

- It is important to stay informed about COVID-19 updates through official sources.
- If you want to talk to someone about COVID-19 vaccines, call the National Coronavirus Helpline on 1800 020 080. The hotline is available 24 hours, seven days a week. For phone interpreting services, call 131 450, and ask to be connected with the National Coronavirus Helpline.
- You can find more information at the Department of Health's website. The website has translated resources in 63 languages: www.health.gov.au/covid19-vaccines-languages
- You can also speak with your doctor.

WHAT TO DO IF YOU HAVE COVID-19 healthdirect

If you test positive for COVID-19 and have no symptoms, or mild symptoms, it is likely you can recover safely at home. If you need medical assistance, you will be cared for. You should only call triple zero (000) or attend an emergency department if your symptoms are severe.

See information on how to manage COVID-19 at home

HOW DO I ISOLATE?
You must self-isolate immediately, stay home and separate from others. If you need advice or support during isolation, call the 24-hour National Coronavirus Helpline on 1800 020 080 or use the healthdirect COVID-19 Symptom Checker.

WHO DO I NEED TO TELL?
You must tell your contacts that you have tested positive for COVID-19. Household members must also get tested and isolate. You should advise your friends, family and work contacts to monitor for symptoms.

HOW CAN I MANAGE MY SYMPTOMS?
Most COVID-19 symptoms are manageable at home with rest and over-the-counter medicines - paracetamol and ibuprofen can relieve pain and fevers, keep hydrated and take cough medicine if needed.

WHAT ARE MILD SYMPTOMS?
COVID-19 affects everyone differently, but even mild symptoms may make you feel quite unwell. To understand the difference between mild, moderate and severe symptoms, go to [healthdirect.gov.au](#)

WHAT IF MY SYMPTOMS GET WORSE?
Use the healthdirect COVID-19 Symptom Checker to know if you should seek medical help, including when to call triple zero (000). If you develop severe symptoms (severe chest pain, fainting episodes, severe difficulty breathing), call Triple Zero (000) straight away and tell them that you have been diagnosed with COVID-19.

WHEN CAN I LEAVE ISOLATION?
You must self-isolate from the day you are tested. You can only leave self-isolation if you have served out the required period and no longer have any COVID-19 symptoms. You do not need to test before leaving self-isolation if you don't have symptoms.

Use the COVID-19 Symptom Checker to find out if you need to seek medical help

Call the National Coronavirus Helpline on 1800 020 080 at any time if you need advice

HOW TO USE SOCIAL MEDIA ASSETS

Information on this page outlines how social media assets can be used.
Follow these simple steps to upload your post:

Choose the resource in the stakeholder pack that you would like to download and click on the link.

Go to your preferred language, click the download button and the resource will save to the download folder on your device.

Check your download folder for the resource and move it to a personal folder or onto your desktop for easy access.

Open any of your social media accounts such as Facebook, Instagram, Signal or Whatsapp and upload the resource from your chosen folder.

You can use the information in this pack to write a post to go with the image.

Tips

- You can adapt the key messages to write your post in a way that is appropriate for your community.
- Deliver the message in a helpful way that encourages your community to share your post.

HOW TO SHARE A GIF ON SOCIAL MEDIA

A GIF is an animated image that can be used on social media platforms like Facebook. Information on this page outlines how to share a GIF.

1 Choose the GIF in this stakeholder pack that you would like to download and click on the link.

2 Go to the language you would like, click the download button and the GIF will save to the download folder on your device.

3 Open your Facebook profile and navigate to the status box.

4 In the status box, click on “photo/video” and select your saved GIF.

5 Use the key message provided in this pack to write a post with the GIF.

6 Once you are all done, and your GIF is uploaded, click Share.
